

## REPLACING THE HANDSET BATTERY

We recommend using a high quality heavy duty PP3/MN1604 9v battery. **The use of rechargeable batteries is not recommended as this will severely affect the performance of the radio transmission.**

### FM Handset

- 1) Unscrew the small silver screw at the bottom of the battery cover

- 2) The battery cover can now be removed

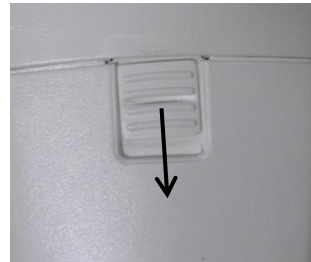

- 3) Remove the old battery and replace
- 4) Replace the battery cover and re-tighten the silver screw

## E Spec / T Spec Handset

- 1) Slide the plastic retaining clip downwards

- 2) Lift off the battery cover from the top edge

- 3) Remove the old battery and replace
- 4) Replace the battery cover and slide the plastic retaining clip upwards to lock the cover in place
